# Adapted Prepositions Book Bundle

This set includes:

The "Under" Book

The "In" Book

The "Next to" Book

The "On" Book

These adapted books are for preschool, speech therapy groups, students with autism, non verbal students and special education learners.

- Spatial concepts can be tricky but they are so important to help our students learn to follow directions and build functional vocabulary. I find focusing on one concept intensely with many repetitions and in different environments really helps. Research backs this.
- Each book contains pictures of **everyday objects** (and some silly objects to keep it fun) to teach the concepts. Pictures are age **appropriate for older students** as well.
- Presented on a white background to **avoid confusion and distraction**., These simple pictures encourage vocabulary development. The book provides opportunities for **multiple repetitions**. A visual sentence strip at the bottom of each page allows students to follow along during group work.
- The books allow the student to match the pictures using velcro, while having the opportunity to verbalize or sign the word
- Picture support in the sentence strips allow for extending sentence length for students at that level
- Because of the consistency and repetition, students that can't read can feel like they are reading by following the consistent structure and visuals
- The interactive component gives hands something to do and makes it easier for groups to follow along.
- This is literacy based, functional and helps with following directions
- Please refer to each individual item description for more specific details.
